

SAMMY JAY

SOFTWARE SOLUTIONS & CONSULTANCY

INTELLIGENCE, ENGINEERED.

BRAND IDENTITY SYSTEM

Version 1.0 / July 2026

Built for complex systems

Brand position

Sammy Jay is a technology engineering and consultancy company that turns ambitious ideas into intelligent, scalable and secure software systems.

The company spans AI and machine learning, blockchain and DeFi, fintech and trading systems, full-stack development, data science, APIs, DevOps, database design and software architecture.

CORE MOTTO

Intelligence, engineered.

PRECISE

Clear thinking, disciplined execution.

AUDACIOUS

Confident enough to tackle difficult ideas.

DEPENDABLE

Secure, documented and built to last.

FORWARD

Focused on tomorrow's systems, today.

The signal monogram

SJ, drawn as a system

The white S represents structure and software. The mint J behaves like a connected execution path. A red signal stroke and blue endpoint complete the idea of engineered action.

Primary lockup

SAMMY JAY

SOFTWARE SOLUTIONS & CONSULTANCY

INTELLIGENCE, ENGINEERED.

Usage rules

- Keep clear space equal to one quarter of the icon width on all sides.
- Minimum icon size: 24 px digital or 8 mm print.
- Use the reverse logo on dark backgrounds and monochrome only when colour is unavailable.
- Never stretch, recolour, rotate, add shadows or rearrange the logo elements.

High signal, low noise

CARBON

#0B0D10

Primary ink / dark ground

PORCELAIN

#F7F4EC

Warm document ground

CIRCUIT MINT

#25E4B3

Core innovation accent

SIGNAL RED

#F04438

Action and emphasis

SYSTEMS BLUE

#1877F2

Digital endpoint accent

SLATE

#667085

Secondary copy

Recommended balance

Carbon and Porcelain should carry most layouts. Mint identifies the brand; Red calls attention; Blue is used sparingly as an endpoint or data accent.

Direct, technical, human

DejaVu Sans Bold

Complex ideas. Clear systems.

Headlines and important statements

DejaVu Sans

Readable, neutral body copy for proposals, invoices and product communication.

DejaVu Sans Mono

BUILD / SECURE / SCALE

Labels, metadata, technical details and mottos

VOICE PRINCIPLES

Lead with the outcome:	Say what the client gains before explaining the machinery.
Be specific:	Prefer measurable scope, concrete deliverables and clear next steps.
Sound confident, not inflated:	Avoid buzzword piles and claims that cannot be demonstrated.
Translate complexity:	Technical depth should make clients feel informed, not excluded.

Formal where it matters

Required identity line

**SAMMY JAY SOFTWARE SOLUTIONS AND CONSULTANCY LTD / RC
9179274**

Use the full legal name and RC number on invoices, contracts, quotations, receipts and formal letters. The short brand name may lead visually.

Client-use notice

Client-use notice: The client is solely responsible for the configuration, deployment, operation and use of delivered software after handover. Sammy Jay Software Solutions and Consultancy Ltd is not responsible for unlawful, unauthorized, abusive or unintended use by the client or third parties. This notice does not exclude liability that cannot lawfully be excluded. Full service terms apply.

Important

This notice is deliberately limited: an invoice footer cannot replace a signed software development agreement, terms of service, privacy notice, acceptable-use policy, warranty clause, indemnity clause or limitation-of-liability schedule. Have Nigerian counsel review those documents for the exact products and markets served.

Recommended next assets
